

JD785B-CellAdvisor™

We have a number of refurbished JD785B Base Station Analyzer units which are ideally positioned to meet customer requirements for the discontinued JD740B product family. The standard unit comes with a Spectrum Analyzer: 9 kHz to 8 GHz, a Cable and Antenna Analyzer: 5 MHz to 6 GHz and a built-in RF Power Meter function: 10 MHz to 8 GHz. In addition, these units have several installed hardware options which you will find detailed below. Units will ship calibrated, with standard accessories and a 12-month warranty.

\$6,995/5,750€/£4,995* EXW
